SUMMARY

Naval architect and structural engineer with a first-class CGPA (3.72/4.00, Dean's List) from MIST, specializing in Structural analysis and parametric ship design. Thesis investigates numerical impact behavior in crossing collisions using ANSYS. Published a review paper and gained hands-on industry exposure at Khulna Shipyard Limited. With fast learning skill, developed self-driven expertise in ANSYS, Rhino 3D, MATLAB, Python, Grasshopper and strong graphic design skills. Have high research interest & skills for the field of structural engineering and sustainable design.

EDUCATION

B.Sc. in Naval Architecture and Marine Engineering May 2022 – June 2026
Military Institute of Science and Technology (MIST), Dhaka, Bangladesh CGPA: 3.72 / 4.00
Thesis: Numerical and Parametric Investigation of Ship's Fore Geometry Impact During Crossing Collision.

EXPERIENCE

Internship Trainee May 2025
Khulna Shipyard Limited, Khulna, Bangladesh

- Gained practical experience in ship building from basic drawing to construction, including finance & standards.
- Visited under construction vessels (Dreger, LCT, Diver Ship, Petrol Craft)
- Developed knowledge on different types of welding, handling

PUBLICATIONS

Review Paper Dec 3, 2024
Engineering: Open Access | Opast Publishing Group
"Advancements in Automation & Parametric Modeling in Ship Design: Review of Current Technologies" (1 cite)

PROJECTS

Design of 156,000 m³ LNG Carrier Mar 2024 – Mar 2025
Ship Design Project Course, MIST

- Determined principal particulars, hydrostatic/stability analyses, and structural strength calculations.
- Performed resistance and power estimation; developed detailed drawings and a 3D ship model.

Informal Self-Developed Parametric Tools in Grasshopper:

- Fully Customizable Horizontal Axis Turbine
- Automating Ship's 3D Hull and Lines Plan from Offset Table
- Ship's Semi-balanced Rudder
- Automating Ship's Structural Framing System

Group Projects on Robotics:

- Quadruped Spider Robot with Obstacle Detector
- Arduino-Controlled Automatic Firefighting Robot

HONORS & AWARDS

Winner – Ship Design Poster Presentation Award January 25, 2026
NAME Fest 2026, MIST — Poster on the design of an oceangoing LNG Carrier.

MIST Dean's List 2024 October 2025
Faculty of Mechanical Engineering, MIST — Achieved CGPA 3.87/4.00 in academic year 2021-22.

MIST Dean's List 2025 October 2025
Faculty of Mechanical Engineering, MIST — Achieved CGPA 3.87/4.00 in academic year 2021-22.

SKILLS

Software	AutoCAD, SolidWorks, Rhino 3D, Maxsurf, Grasshopper, MATLAB, ANSYS, Blender, Illustrator, SPSS, MS Office
Technical	Finite Element Analysis (FEM), Computational Fluid Dynamics (CFD), Computer-Aided Design (CAD), Parametric Modeling, Machine Learning (Basic), C, Python
Soft Skills	Fast Learner, Communication, Event Management, Problem-Solving

CERTIFICATIONS

Certified Course on Maxsurf and Rhinoceros	Dept. of NAME, MIST
Introduction to Computational Fluid Dynamics	Dept. of BME, MIST
FEM – Linear, Nonlinear Analysis & Post Processing	Coursera
Intro to Ansys Fluent	Ansys
Getting Started with Ansys Mechanical	Ansys
Rhino 8	Udemy
Introduction to Ballast Water Management and Compliance	International Maritime Organization
MATLAB Onramp	MathWorks
Machine Learning Onramp	MathWorks
Deep Learning Methods for Engineers	Dept. of BME, MIST
Data Science and Analytics	HP LIFE
Database Programming	Bangladesh Technical Education Board

EXTRA CURRICULAR ACTIVITIES

Director of Graphics Design – NAME Fest 2026 , Dept. of NAME, MIST	2026
— Designed all official posters and banners while collaborating with organizing team.	
Co-Designer – The SAIL Magazine , Dept. of NAME, MIST	2022
— Worked as co-designer for a departmental publication.	
Marketing Volunteer – Amraa Bondhu Foundation , Satkhira, Bangladesh	2018 – 2021
— Contributed to social media marketing, donation collection, and social initiatives for rural youth.
